

- **BLS International reinforces continuous security and data protection measures for VISA Services in Algeria / Morocco**
- *Launches citizen awareness campaign to combat fraud and unauthorized intermediaries*

Casablanca / Algiers, February 02, 2026 – BLS International, a trusted global partner to governments and a leading provider of AI- and technology-enabled government-to-citizen (G2C) services, today highlighted its continued investments in advanced cybersecurity, digital infrastructure, and fraud-prevention systems to ensure secure, reliable, and equitable access to visa application services for applicants in Morocco and Algeria.

BLS International has also launched a citizen awareness and anti-fraud drive across (country) to educate applicants about common fraudulent practices, warn against unauthorized agents and intermediaries, and reinforce the importance of using only official BLS International platforms and channels for visa appointments and submissions.

Over the years, BLS International has consistently strengthened its technology ecosystem to enhance applicant experience while maintaining the highest standards of security, compliance, and system integrity. Its digital platforms—including online appointment scheduling, application submission workflows, and biometric enrolment systems—operate at significant scale and manage very high volumes of daily traffic, particularly during peak travel seasons.

To support this scale securely, BLS International has implemented a **multi-layered, enterprise-grade technology architecture** designed to deliver high availability, operational stability, and robust protection against evolving cyber threats.

Key elements of this infrastructure include:

- Advanced Persistent Threat (APT) protection to defend against sophisticated cyberattacks
- Real-time threat-intelligence systems monitoring emerging risks
- Server-side validation of biometric and liveness checks
- Enhanced bot-prevention technologies at both application and server levels designed to ensure fair access for genuine users.
- Custom rate-limiting on individual system endpoints to prevent overload and abusive automation
- Continuously updated Web Application Firewall (WAF) rules based on traffic behavior
- Server-level fraud and anomaly detection mechanisms
- High-load management using concurrency controls and advanced database row-locking
- Regular platform updates aligned with evolving usage patterns and threat landscapes

According to Amit Ganpuley, Regional Head for North Africa, BLS International:

“We continuously invest in advanced security engineering, system resilience, and performance optimisation to ensure that applicants across North Africa can access our services through stable, protected, and internationally compliant digital infrastructure. Technology plays a central role in safeguarding applicants, government processes, and public trust.”

“Alongside our technology investments, we have launched a targeted fraud-awareness campaign to educate applicants about common scams and unauthorized intermediaries. We strongly encourage applicants to rely only on official BLS International channels and to remain vigilant against misleading claims or promises of expedited appointments.”

Through sustained investment in cybersecurity and infrastructure modernisation, BLS International remains committed to providing applicants in Algeria / Morocco with a secure, transparent, and resilient digital environment, while supporting the operational and security requirements of its government partners across the region.

About BLS International Services Limited:
