Independent Auditors' Report

To,

The Shareholder of BLS International FZE and its Subsidiaries

Sharjah - United Arab Emirates

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of **BLS International FZE** (the Parent) and its subsidiaries (together, the Group) which comprise the consolidated statement of financial position as at March 31, 2026 and the consolidated statements of comprehensive income, consolidated statement of changes in shareholders' equity, consolidated statement of cash flows for the year then ended and a summary of Material Accounting Policy Information and other explanatory notes.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as at 31st March 2026 and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Group in accordance with the requirements of Code of Ethics for Professional Accountants, issued by International Ethics Standards Board for Accountants (IESBA) together with ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We refer to Note 1 to the consolidated financial statements; we have performed the audit only on the standalone financial statements of the BLS International FZE (Parent Establishment) and its subsidiary in UAE (BLS International Services LLC). We have not performed any audit procedures as per International Standard on Auditing 600: 'Special Considerations – Audits of Group Financial Statements' (ISA 600) on the financial statements of subsidiaries located outside UAE.

Management Responsibility

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements.

We communicate with management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

Further, we report that:

- 1 We have obtained all the information and explanations which we considered necessary for our audit,
- 2 The consolidated financial statements have been prepared and comply, in all material respects, with the applicable provisions of implementing regulations related to Hamriyah Free Zone.
- 3 The Group has maintained proper books of accounts.
- 4 Based on the information that has been made available to us, nothing has come to our attention which causes us to believe that the Group has contravened, during the financial year ended March 31, 2026.

2 Adoption of new and revised International Financial Reporting Standards and Interpretations

2.1 New and revised IFRS in issue but not effective and not early adopted

The following standards, amendments thereto and interpretations have been issued prior to March 31, 2026, but their effective dates of adoption are for future periods:

New and revised IFRS	Effective for annual periods beginning on or after
IFRS-18 - Presentation and Disclosure in Financial Statements	01 Jan 2027
IFRS-19 - Subsidiaries without Public Accountability Disclosures	01 Jan 2027

IFRS-18 - Presentation and Disclosure in Financial Statements

IFRS 18 will replace IAS 1 Presentation of Financial statements and introduces new requirement for the presentation of the statement of profit or loss, including defined subtotals, enhanced principles for aggregation and disaggregation, and expanded disclosure requirements aimed at improving comparability and transparency of financial performance information.

IFRS-19 - Subsidiaries without Public Accountability Disclosures

IFRS 19 introduces a reduced disclosure framework for eligible subsidiaries that do not have public accountability and whose parent prepares consolidated financial statements in accordance with IFRS Accounting Standards. The standard permits such subsidiaries to apply IFRS recognition and measurement requirements while benefitting from reduced disclosures.

3 Material Accounting Policy Information

3.1 Statement of compliance:

These consolidated financial statements have been prepared in accordance with and comply with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB) and the requirements of applicable provisions of implementing regulations related to Hamriyah Free Zone Authority.

3.2 Basis of measurement

These consolidated financial statements have been prepared under the historical cost basis, except for Investments at fair value through other comprehensive income (FVOCI) and Investments at fair value through profit and loss (FVTPL).

Historical cost is generally based on the fair value of the consideration given in exchange of goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

3.3 Functional and presentation currency

These consolidated financial statements are prepared and the items included in the consolidated financial statements are measured using the currency of the primary economic environment in which the Group operates ('the functional currency'). These consolidated financial statements are presented in Arab Emirates Dirhams (AED), which is the Group's functional and presentation currency.

3.4 Basis of consolidation

3.4.1 Subsidiaries

The consolidated financial statements incorporate the financial statements of the Group and entities controlled by the Group (its subsidiaries) made up to March 31 each year. Control is achieved when the Group:

- has the power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Group has less than a majority of the voting rights of an investee, it considers that it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Group considers all relevant facts and circumstances in assessing whether or not the Group's voting rights in an investee are sufficient to give it power, including:

- the size of the Group's holding of voting rights relative to the size and dispersion of holdings of the other vote holders.
- potential voting rights held by the Group, other vote holders or other parties.
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Group has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholder's meetings.

The consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, the results of subsidiaries acquired or disposed of during the year are included in profit or loss from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used into line with the Group's accounting policies.

All intra-company assets and liabilities, equity, income, expenses and cash flows relating to transactions between the members of the Group are eliminated on consolidation.

3.4.2 Non-controlling interests

Non-controlling interests in subsidiaries are identified separately from the Group's equity therein. Those interests of non-controlling shareholders that are present ownership interests entitling their holders to a proportionate share of net assets upon liquidation may initially be measured at fair value or the noncontrolling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement is made on an acquisition-by-acquisition basis.

Other non-controlling interests are initially measured at fair value. After the acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity. Profit or loss and each component of other comprehensive income are attributed to the owners of the Group and non-controlling interests. Total comprehensive income of the subsidiaries is attributed to the owners of the Group and the non-controlling interests even if this results in the noncontrolling interests having a deficit balance.

Changes in the Group's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Group.

3.4.3 Loss of control

When the Group loses control of a subsidiary, the gain or loss on disposal recognized in profit or loss is calculated as the difference between:

- the aggregate of the fair value of the consideration received and the fair value of any retained interest
- and
- the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any non-controlling interests.

All amounts previously recognized in other comprehensive income concerning that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary.

The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IFRS 9 when applicable, or the cost on initial recognition of an investment in an associate or a joint venture.

3.5 Going concern

The directors have, at the time of approving the consolidated financial statements, a reasonable expectation that the Group have adequate resources to continue in operational existence for the foreseeable future. Thus, they continue to adopt the going concern basis of accounting in preparing the consolidated financial statements.

3.6 Investment in associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

Investments in associates are accounted for using the equity method of accounting. Under the equity method, the investment is initially recognised at cost, and the carrying amount is increased or decreased to recognize the investor's share of the profit or loss of the investee after the date of acquisition. If the ownership interest in an associate is reduced, but the significant influence is retained, only a proportionate share of the amounts previously recognized in other comprehensive income is reclassified to profit or loss where appropriate.

The Group's share of post-acquisition profit or loss is recognised in the consolidated statement of profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment.

When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether there is any objective evidence that the investment in associates is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and the carrying value and recognizes the amount within impairment losses in the consolidated income statement.

When a Group entity transacts with an associate of the Group, profits and losses resulting from the transactions with the associate are recognized in the Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not related to the Group.

The consolidated financial statement of the associates is prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

3.7 Business combinations

Business combinations are accounted for using the acquisition method, the cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value and the amount of any non-controlling interest in the acquiree. For such business combination, the acquirer measures the non-controlling interest in the acquiree that are present ownership interest and entitle their holders to a proportionate share of the assets in the event of liquidation either a fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

When the Group acquires a business, it assessed the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value as at the acquisition date, and the resulting gain/loss is included in the statement of profit or loss or other income as appropriate.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value on the acquisition date. Subsequent changes to the fair value of the contingent consideration, which is deemed to be an asset or liability will be recognized in accordance with IFRS 9 "financial instruments". If the contingent consideration is classified as equity, it shall not be remeasured until it is finally settled within equity.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at the date.

3.8 Disposal of associate

When the Group is committed to a sale plan involving the disposal of an investment in an associate or, a portion of an investment in an associate, the investment, or the portion of the investment in the associate, that will be disposed of is classified as held for sale when the criteria described above are met.

The Group then ceases to apply the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate that has not been classified as held for sale continues to be accounted for using the equity method.

3.9 Foreign currency translation

3.9.1 Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of outstanding amounts of such transactions and from the re-translation of monetary assets and liabilities denominated in foreign currencies at the end of each reporting period are recognized in the consolidated statement of comprehensive income.

At the end of each reporting period, monetary items denominated in foreign currencies are re-translated at the rates prevailing on that date. Non-monetary items carried at fair value that are denominated in foreign currencies are re-translated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

3.9.2 Group entities

The results and financial position of all the Group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (i) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of the statement of financial position;
- (ii) income and expenses for each statement of income are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
- (iii) all resulting exchange differences are recognized in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognized in other comprehensive income.

3.10 Property, plant and equipment

Property, plant and equipment are carried at historical cost, less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

The carrying amount of the replaced part is derecognized. All other repairs and maintenance costs are recognized in the consolidated income statement during the financial period in which they are incurred.

Depreciation is calculated on the straight-line method, at rates calculated to allocate the cost of assets less their estimated residual value over their expected useful lives as follows:

Building	32 years
Leasehold improvements	10 years
Office equipment	20-22 years
Furniture & fixtures	15-16 years
Vehicles	10 years

The residual values, useful lives and depreciation method are reviewed periodically to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefit from these assets, and adjusted prospectively, if appropriate. An asset's carrying amount is written down immediately to its recoverable amount if the carrying amount is greater than its estimated recoverable amount.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in the consolidated statement of comprehensive income.

3.11 Right of use assets

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities (Note 3.18). Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets, as follows:

- Office space 3-4 years

The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Impairment of non-financial assets' policy (Note 3.13).

3.12 Intangible assets

Intangible assets acquired separately are reported at cost less accumulated amortization and accumulated impairment losses. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred. The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortized over the useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Subsequent to initial recognition, intangible assets are reported at cost less accumulated amortization and accumulated impairment losses. The amortization method and estimated useful lives are reviewed at the end of each annual reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

The amortization expense on intangible assets with finite lives is recognized in the consolidated statement of comprehensive income as the expense category that is consistent with the function of the intangible assets.

Software

Acquired software licenses are capitalized on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortized on a straight-line basis over their estimated useful lives which are normally a period of 3 to 6 years.

Other intangible assets

Other intangible assets represent key money paid to agents to operate business abroad. These costs are recognized as an asset and amortized on a straight-line basis over a period of 3 to 10 years in line with the agreement terms.

3.13 Impairment of non-financial assets

Assets that have an indefinite useful life, for example, goodwill or intangible assets not ready to use, are not subject to amortization and are tested annually for impairment. Assets that are subject to amortization/depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell, and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels, for which there are mostly independent cash inflows (cash-generating units). Prior impairments of non-financial assets (other than goodwill) are reviewed for a possible reversal on each reporting date.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of one to five years. For more extended periods, a long-term growth rate is calculated and applied to projected future cash flows after the fifth year.

Impairment losses are recognized in the consolidated income statement in expense categories consistent with the function of the impaired asset, except for assets previously revalued with the revaluation taken to other comprehensive income. For such assets, the impairment is recognized in other comprehensive income up to the amount of any previous revaluation.

3.14 Financial instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit and loss are recognized immediately in profit or loss.

3.14.1 Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognized financial assets are measured subsequently in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

3.14.2 Classification of financial assets

Financial assets at amortised cost:

Debt instruments that meet the following conditions are measured subsequently at amortised cost:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Group's financial assets measured at amortised cost include accounts and other receivables

Financial assets at Fair Value Through Other Comprehensive Income (FVTOCI):

(a) Debt instruments classified as at FVTOCI:

Debt instruments that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(b) Equity instruments classified as at FVTOCI:

On initial recognition, the Group may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument).

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the investments' revaluation reserve. The cumulative gain or loss is not reclassified to profit or loss on disposal of the equity investments, instead, it is transferred to retained earnings.

Dividends on these investments in equity instruments are recognised in profit or loss in accordance with IFRS 9 unless the dividends clearly represent a recovery of part of the cost of the investment.

The Group designated all investments in equity instruments that are not held for trading as at FVTOCI on initial recognition.

The Group's financial assets at FVTOCI consists of investment in bonds.

Financial assets at Fair Value Through Profit and Loss (FVTPL):

By default, all other financial assets are measured subsequently at fair value through profit and loss (FVTPL). Despite the preceding, the Group may make the following irrevocable election/designation at initial recognition of a financial asset:

- the Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if specific criteria are met; and
- the Group may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

The Group's financial assets at FVTPL consist of unquoted equity investments.

3.14.3 Amortised cost and effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and of allocating interest income over the relevant period.

For financial instruments other than purchased or originated credit-impaired financial assets (i.e., assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding expected credit losses, through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

The amortized cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortization using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortized cost of a financial asset before adjusting for any loss allowance.

Interest income is recognized using the effective interest method for debt instruments measured subsequently at amortized cost and at FVTOCI. For financial instruments other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired.

For financial assets that have subsequently become credit-impaired, interest income is recognized by applying the effective interest rate to the amortized cost of the financial asset. If in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognized by applying the effective interest rate to the gross carrying amount of the financial asset.

Interest income is recognized in profit or loss and is included in the "finance income" line item.

3.14.4 Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on accounts and other receivables. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

The Group recognizes lifetime ECL for accounts and other receivables, and related party balances. The expected credit losses on these financial assets are estimated based on the Group's historical credit loss experience of the debtor, adjusted for factors that are specific to the debtor and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group recognizes lifetime ECL when there has been a significant increase in credit risk since initial recognition. However, if the credit risk on the financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECL. The assessment of whether lifetime ECL should be recognized is based on significant increases in the likelihood or risk of a default occurring since initial recognition instead of on evidence of a financial asset being credit-impaired at the reporting date.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

Investments in equity instruments designated as investments at FVTPL and FVTOCI are not subject to impairment.

3.14.5 Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, and other similar organizations, as well as consideration of various external sources of actual and forecast economic information that relates to the Group's core operations.

Despite the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if:

- The financial instrument has a low risk of default;
- The borrower has a strong capacity to meet its contractual cash flow obligations in the near term; and
- Adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying a significant increase in credit risk before the amount becomes past due.

3.14.6 Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that receivables that meet either of the following criteria are generally not recoverable:

- when there is a breach of financial covenants by the counterparty; or
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full.

Irrespective of the above analysis, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

3.14.7 Credit impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- the significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default or past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or
- the disappearance of an active market for that financial asset because of financial difficulties.

3.14.8 Write off policy

The Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognized in profit or loss.

3.14.9 Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e., the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date.

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate.

If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12-months ECL at the current reporting date, except for assets for which simplified approach was used.

The Group recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

3.14.10 De-recognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains all the risks and rewards of ownership substantially and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains all the risks and rewards of ownership of a transferred financial asset substantially, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On derecognition of a financial asset measured at amortized cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss.

3.14.11 Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received net of direct issue costs.

Financial liabilities

All financial liabilities are measured subsequently at amortised cost using the effective interest method or at FVTPL. However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, and financial guarantee contracts issued by the Group, are measured in accordance with the specific accounting policies set out below:

Financial liabilities measured subsequently at amortised cost

Financial liabilities that are not:

- contingent consideration of an acquirer in a business combination,
- held-for-trading, or
- designated as at FVTPL, are measured subsequently at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expenses over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of financial liability.

The Group's financial liabilities measured at amortised cost include accounts and other payables (less advances, VAT payable and Tax payable) and lease liabilities.

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

3.14.12 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

3.15 Taxation

The tax expense for the period comprises current tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

3.15.1 Current tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

3.15.2 Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, are recognized subsequently if new information about facts and circumstances change. The adjustment is either treated as a reduction in goodwill (as long as it does not exceed goodwill) if it was incurred during the measurement period or recognized in profit or loss.

3.15.3 Value added tax

Output value-added tax related to sales is payable to tax authorities on the earlier of:

- collection of receivables from customers or
- delivery of goods or services to customers.

Input VAT is generally recoverable against output VAT upon receipt of the VAT invoice. The tax authorities permit the settlement of VAT on a net basis. VAT related to sales and purchases is statement of financial position on a gross basis – unless the Group has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously. Where provision has been made for the ECL of receivables, the impairment loss is recorded for the gross amount of the debtor, including VAT.

3.16 Borrowing costs

Borrowing costs related to the acquisition, construction and production of the qualifying assets are treated as part of the cost of the relevant assets. Qualifying assets are those assets that take a substantial period to get ready for their intended use. The borrowing costs eligible for capitalization are the actual borrowing costs incurred on the borrowing during the year less any investment income on the temporary investment of those borrowings.

The borrowing costs eligible for capitalization are determined by applying capitalization rate to the expenditures on the qualifying assets.

The capitalization rate is the weighted average of the borrowing applicable to the borrowings of the Group that are outstanding during the year, other than borrowings made specifically for the purpose of obtaining the qualifying assets.

Capitalization of borrowing costs commence when:

- Expenditures for the qualifying assets being incurred.
- Borrowing costs are being incurred, and
- Activities that are necessary to prepare the qualifying assets for their intended use or sale are in progress.

Capitalization of borrowing costs ceases when substantially all activities necessary to prepare the qualifying assets for their intended use or sale are complete.

All other borrowing costs are expensed in the period in which they occur.

3.17 Provision for employees' end of service indemnity

Estimated amounts required to cover employees' end of service indemnity at the date of consolidated statement of financial position are computed pursuant to the UAE Labour Law based on the employees' accumulated period of service and current remuneration at the date of consolidated statement of financial position.

Provision is made subject to actuarial techniques. Actuarial Gains and losses arising from experience adjustments and changes in assumptions are charged or credited to equity in the other comprehensive income in the period in which they occur.

3.18 Leases

At the inception of a contract, the Group assesses whether the contract is, or contains a lease. A contract is or contains a lease if the contracts convey the right to control the use of an identified asset for the Group for a period in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assess whether:

- The contract involves the use of an identified asset; this may be specified explicitly or implicitly and should be physically distinct or represent substantially all the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified.
- The Group has the right to obtain substantially all the economic benefits from the use of the asset throughout the period of use; and
- The Group has the right to direct the use of the asset. The Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Group has the right to direct the use of the asset if either:
 - _ The Group has the right to operate the asset; or
 - _ The Group designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on a reassessment of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component based on their relative stand-alone prices.

However, where the contract is not separable into a lease and non-lease component then the Group has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Group determines the lease term as the non – cancellable period of a lease, together with both:

- periods covered by an option to extend the lease if the lessee is reasonably certain to exercise that option; and
- (a) periods covered by an option to terminate the lease if the lessee is reasonably certain not to exercise that option.
- (b)

In assessing whether a lessee is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, the Group considers all relevant facts and circumstances that create an economic incentive for the lessee to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Group revises the lease term if there is a change in the noncancellable period of a lease.

3.18.1 Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities.

The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, plus an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located and lease payments made at or before the commencement date less any lease incentives received unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term.

The recognised right-of-use assets are subsequently depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. Also, the right-of-use assets are periodically reduced by impairment losses, if any and adjusted for certain remeasurements of the lease liability.

3.18.2 Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of property, plant and equipment (those leases that have a lease term of 12 months or less and do not contain a purchase option). It also applies the lease of low-value assets exemption to leases that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

3.18.3 Lease liability

The lease liability is initially recognised at the present value of the lease payments that are not paid in the commencement date. The lease payments are discounted using the interest rate implicit in the lease if that rate can be readily determined. If that rate cannot be readily determined, the Group used its incremental borrowing rate.

After initial recognition, the lease liability is measured by:

- Increasing the carrying amount to reflect interest on the lease liability;
- Reducing the carrying amount to reflect the lease payments made; and
- Remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments.

Where,

- There is a change in the lease term as a result of reassessment of certainty to exercise an exercise option, or not to exercise a termination option as discussed above; or
- There is a change in the assessment of an option to purchase the underlying asset, assessed considering the events and circumstances in the contract of a purchase option, the Group remeasures the lease liability to reflect changes to lease payments by discounting the revised lease payments using a revised discount rate. The Group determined the revised discount rate as the interest rate implicit in the lease for the remainder of the lease term if that rate can be readily determined.
- There is a change in the amounts expected to be payable under a residual value guarantee; or
- There is a change in future lease payments resulting from a change in an index or a rate used to determine those payments, including a change to reflect changes in market rental rates following a market rent review. The Group remeasures the lease liabilities by discounting the revised lease payments using an unchanged discount rate unless the change in lease payments results from a change in floating interest rates. In such case, the Group use a revised discount rate that reflects a change in the interest rate.

The Group recognises the amount of the re-measurements of lease liability as an adjustment to the right-of-use asset. Where the carrying amount of the right-of-use asset is reduced to zero, and there is a further deduction in the measurement of the lease liability, the Group recognises any remaining amount of the remeasurement in profit or loss.

The Group accounts for a lease modification as a separate lease if both:

- a) The modification increases the scope of the lease by adding the right to use one or more underlying assets; and
- b) The consideration for the lease increase by an amount commensurate with the stand-alone price for the increase in scope and any appropriate adjustments to that stand-alone price to reflect the circumstances of the context.

For lease modifications that are not accounted for as a separate lease, the Group, at the effective date of the lease modification:

- a) Allocates the consideration in the modified contract;
- b) Determines the lease term of the modified lease; and
- c) Remeasures the lease liability by discounting the revised lease payments using a revised discount rate.

The revised discount rate is determined as the interest rate implicit in the lease for the remainder of the lease term if that rate can be readily determined, or the lessee's incremental borrowing rate at the effective rate of the modification, if the interest rate implicit in the lease cannot be readily determined.

3.19 Current and non-current classification

The Group presents assets and liabilities in the consolidated statement of financial position based on current/non-current classification.

An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle.
- Held primarily for the purpose of trading.
- Expected to be realized within twelve months after the reporting period.
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle.
- It is held primarily for the purpose of trading.
- It is due to be settled within twelve months after the reporting period.
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as current assets and liabilities.

3.20 Measurement of fair values

A number of the Group's accounting policies and disclosures require the determination of fair values, for both financial and non-financial assets and liabilities.

The Group has an established control framework with respect to the measurement of fair values. This includes a management team that has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values. The management team regularly reviews significant unobservable inputs and valuation adjustments.

If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management team assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of an asset or liability, the Group uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs)

If the inputs used to measure the fair value of an asset or liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

3.21 Property, plant and equipment

3.21.1 Fair value measurement

Property, plant and equipment is measured at fair value less accumulated depreciation and accumulated impairment losses. Valuations are performed frequently enough to ensure that the carrying amount does not materially differ from its fair value.

Increases to carrying value resulting from revaluations are recognised in other comprehensive income and accumulated in equity under revaluation surplus, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss. Decreases are recognised in profit or loss, except to the extent that it offsets an existing surplus on the same asset recognised in comprehensive income.

3.22 Revenue recognition

Revenue is recognized to the extent that the economic benefits will probably flow to the entity and can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account the contractually defined terms of payment and excluding discounts, rebates, returns, price adjustments and other transaction taxes or duties. The following specific recognition criteria must also be met before revenue is recognized:

3.22.1 Fair value measurement

Revenue from contracts with customers is considered in line with IFRS 15; which outlines a single comprehensive model of accounting for revenue arising from contracts with customers. It establishes a five-step model to recognize revenue arising from contracts with customers.

Step 1: Identify the contract with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for each of those rights and obligations.

Step 2: Identify the performance obligations in the contract: A performance obligation in a contract is a promise to transfer a good or service to the customer.

Step 3: Determine the transaction price: Transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring the promised goods and services to a customer, excluding amounts collected on behalf of third parties.

Step 4: Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Group will allocate the transaction price to each performance obligation in an amount that depicts the consideration to which the Group expects to be entitled in exchange for satisfying each performance obligation.

Step 5: Recognize revenue as and when the entity satisfies a performance obligation at a point or over time.

The Group recognizes revenue over time if any one of the following criteria is met:

- The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs; or
- The Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- The Group's performance does not create an asset with an alternative use to the Group and the entity has an enforceable right to payment for performance obligation completed to date.

The Group allocates the transaction price to the performance obligations in a contract based on the input method which requires revenue recognition on the basis of the Group's efforts or inputs to the satisfaction of the performance obligations. The Group estimates the costs to complete the projects in order to determine the amount of revenue to be recognized.

When the Group satisfies a performance obligation by delivering the promised goods and services, it creates a contract asset based on the amount of consideration earned by the performance. Where the amount of consideration received from a customer exceeds the amount of revenue recognized, this gives rises to a contract liability.

3.22.2 Revenue from services

The Group manages the administrative function of the visa and passport applications process for various countries. Revenue comprises of the value of services provided mainly from renewal of passports, processing of visa application and other value-added services including courier and SMS services and recognized upon invoicing to the customers. Revenue has been based on the gross invoices made during the year and revenue against such services are recognized at a point in time upon completion and satisfies the performance obligation in line with the terms of contract with customer.

3.22.3 Government grant

The grant is recognised as income over the period necessary to match them with the related costs, for which they are intended to compensate on a systematic basis.

3.22.4 Finance income

Interest income

Interest income from financial assets is recognized when it is probable that the economic benefits flow to the entity and the amount of income can be estimated reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and the effective interest rate applicable, which is the rate that exactly discounts estimated future cash flows through the expected life of the financial asset to the net carrying amount on initial recognition.

3.23 Direct expenses

Direct expenses include direct operating expenses incurred in generating revenue. Direct expenses are recognized over the term that the associated revenue is recognized.

4 Significant judgments and estimation uncertainty

The preparation of the consolidated financial statements in compliance with IFRS requires the management to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and contingent liabilities. Future events may occur, which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the consolidated financial statements as they become reasonably determinable.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

4.1 Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognised in the consolidated financial statements:

4.1.1 Going concern assumption

Management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Group's ability to continue as a going concern. Therefore, the consolidated financial statements continue to be prepared on the going concern basis.

4.1.2 Revenue recognition

Management considers recognizing revenue over time; if one of the following criteria is met, otherwise, revenue will be recognized at a point in time:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- the Group's performance does not create an asset with an alternative use to the entity, and the entity has an enforceable right to payment for performance completed to date.

4.1.3 Judgements in determining the timing of satisfaction of performance obligations

The Group generally recognise revenue over time as it performs continuous transfer of control of goods/services to the customers. Because customers simultaneously receive and consume the benefits provided and the control transfer takes place over time, revenue is also recognised based on the extent of transfer/completion of the transfer of each performance obligation. In determining the method of measuring progress for these performance obligations, the Group considers the nature of these goods and services as well as the nature of its performance.

4.1.4 Determination of transaction prices

In the process of determining transaction prices in respect of its contracts with customers, the Group assesses the impact of any variable consideration in the contract due to discounts, penalties, the existence of any significant financing component or any non-cash consideration. In determining the impact of variable consideration, the Group uses the most likely amount method under IFRS 15 whereby the transaction price is determined by reference to the single most likely amount in a range of possible consideration amounts.

4.1.5 Transfer of control in contracts with customers

In cases where the Group determines that performance obligations are satisfied at a point in time, revenue is recognized when control over the assets is transferred to the customer or benefits of the services being provided is received and consumed by the customer.

When evaluating whether a customer obtains control of an asset, the Group considers its present right to payment for the asset, the customer's legal title to the asset, physical possession of the asset, significant risks and rewards related to the ownership of the asset, the acceptance of the asset by the customer and also any agreements to repurchase the assets.

In cases where the Group determines that performance obligations are satisfied at a point in time, revenue is recognised when control over the asset that is the subject of the contract is transferred to the customer. In the case of contracts to sell real estate assets this is generally when the consideration for the unit has been substantially received, and there are no impediments in the handing over of the unit to the customer.

4.1.6 Impairment of investment in associates

The Group follows the guidance of IAS 39 to determine when an available for sale financial asset is impaired, and considers whether there has been a significant or prolonged decline in their fair value below cost. This determination of what is significant or prolonged decline requires significant judgment. In making this judgment the Group evaluates, among other factors, the duration and extent to which the fair value of an investment is less than its cost; and the financial health of and near term business outlook for the investee, including factors such as industry and sector performance, changes in technology and operational and financing cash flows and pay out dividend capability of the investee.

4.1.7 Employees' end of service indemnity

Provision for employees' end of service indemnity is grouped as a non-current liability on the judgment that the employees of the Group will be continued in the future periods irrespective of their visa expiry dates and other employment terms and conditions.

4.1.8 Determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated) including the consideration of the life of underlying assets on the premises.

4.1.9 Discounting of lease payments

The Group, as a lessee, measures the lease liability at the present value of the unpaid lease payments at the commencement date. The lease payments are discounted using the interest rate implicit in the lease if that rate can be readily determined. If that rate cannot be readily determined, the Group uses its incremental borrowing rate.

The incremental borrowing rate is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment.

The Group determines its incremental borrowing rate with reference to its current and historical cost of borrowing adjusted for the term and security against such borrowing.

4.1.10 Contingencies

Contingent assets and liabilities are not recognized in the consolidated financial statements unless it is probable as a result of past events that an outflow of economic resources will be required to settle a present, a legal and constructive obligation; and the amount can be reliably estimated. Else, they are disclosed unless the possibility of an inflow or outflow, respectively of resources embodying economic benefits is remote.

4.1.11 Control over investee

When determining control over an investee, management considers whether the Group has a "de facto" power to control an investee if it holds less than 50% of the investee's voting rights. The assessment of the investee's relevant activities and the ability to use the Group's power to affect the investee's variable returns requires significant judgement.

4.1.12 Significant influence assessment

When determining significant influence over an investee, management considers whether the Group has the power to participate in the financial and operating policies of decisions of the investee if it holds less than 20% of the investee's voting rights. The assessment, which requires significant judgement, involves consideration of the Group's representation of the investees' board of directors, participation in policy-making decisions and material transactions between the entities.

4.1.13 Impairment of non-financial assets

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount.

The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a DCI model and requires estimation of the expected future cash flows from the asset (or of the cash-generating unit) in the forecasted period and also to determine a suitable discount rate in order to calculate the present value of those cash flows. The discount rate reflects current market assessments of the time value of money and the risks specific to the asset.

4.1.14 Impairment of financial assets

In measuring the expected credit loss allowance for financial assets measured at amortised cost, management uses the Expected Credit Loss (ECL) model and assumptions about future economic conditions and credit behaviour such as likelihood of customer defaulting. Management considers the following judgements and estimates:

- _ Development of ECL model, including formula and choice of inputs;
- _ Determining the criteria if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime ECL basis and the qualitative assessments;
- _ The segmentation of financial assets when the ECL is assessed on a collective basis; and
- _ Determination of associations between macroeconomic scenarios and, economic inputs, and their effect on probability of default (PDs), exposure at default (EADs) and loss given default (LGD); and
- _ Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into ECL models.

4.1.15 Control over subsidiaries

The Parent follows the guidance of IFRS 10 'Consolidated Financial Statements' in determining whether it controls an entity and this determination requires significant judgment. In making this judgment, the Parent evaluates, among other factors, the power it has over the investee, the rights to variable returns from its involvement with the entity, and the ability to use its power to affect the returns of the entity. The Parent considers all relevant facts and circumstances in assessing whether or not the voting rights in an investee are sufficient to give it power.

4.2 Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the date of consolidated statement of financial position, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below:

4.2.1 Useful life of property, plant and equipment

Property, plant and equipment are depreciated over their estimated useful lives, which is based on expected usage of the asset and expected physical wear and tear which depends on operational factors. The management has not considered any residual value as it is deemed immaterial.

4.2.2 Useful life of intangible assets

Intangible assets are amortized over their estimated useful lives, which is based on expected pattern of consumption of the future economic benefits embodied in the assets.

4.2.3 Taxes

The Group recognises liability for the anticipated taxes levied in the jurisdiction of its activity based on estimate of whether additional taxes will be due. Whether the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made. Any changes in the estimate and assumptions may have an impact on the carrying values of the deferred taxes.

Notes to the Financial Statements (continued)

More than 365 days	10,16,375	2,34,005
	1,25,52,349	1,45,47,972

The group measures the loss allowances for accounts receivables at an amount equal to lifetime ECL using the simplified approach. The expected credit loss on accounts receivables is estimated by using a provision matrix by reference to past default experience of debtors and an analysis of debtor's current financial positions, adjusted for factors that are specific to the debtors' economic conditions of the industry.

BLS INTERNATIONAL FZE
Sharjah - United Arab Emirates

Notes to the Financial Statements (continued)
For the year ended March 31, 2026

The provision has been recognised on the basis of below provision matrix :

14.1 Description of nature and purpose of each reserve

- i **Foreign Currency Translation Reserve**
Exchange difference relating to the translation of the results and net assets of the group's foreign operations from their functional currencies to the group's presentation currency (i.e. AED) are recognized directly in the other comprehensive income and accumulated in foreign currency translation reserve. Exchange difference previously accumulated in the foreign currency translation reserve are reclassified in the statement of profit or loss on the disposal of the foreign operation.
- ii **Retained Earnings**
Retained earnings are the profits that the group has earned till date less dividends or other distributions paid to shareholders. Retained earnings is a free reserve available to the group.
- iii **Other Reserve**
According to the Turkish Commercial Code, first order legal reserves are set aside as 5% of the legal net profit until 20% of the paid in capital of the Company (BLS Turkey) reached. The second order legal reserves correspond to 10% of the Company (BLS Turkey) profits that exceed 5% of the paid in capital of the Company (BLS Turkey). According to the Turkish Commercial Code, legal reserves may be utilized exclusively on the netting of the Company losses as long as they do not exceed 50% of the paid-in capital, other than purpose, they may not be utilized in any other manner.
- iv **Capital Reserve**
Capital reserve represents opening balances of reserves and surplus of few entities acquired during the year. The reserve is utilised in accordance with the provisions of the Companies Act, 2013.
- v **Other Comprehensive Reserve**
This represents the cumulative gain or losses arising on the revaluation of equity instruments measured at fair value through other comprehensive income, under an irrevocable option, net of amount reclassified to retained earnings when such assets are disposed off.

The group enters into transactions with parties that fall within the definition of a related party as contained in International Accounting Standard 24. Related parties comprise entities under common ownership and/or common management and control and key management personnel. The shareholder and the management decide on the terms and conditions of the transactions and services received/ rendered from/to related parties as well as on other charges.

The management confirms that all international and specific domestic transactions with related enterprises are undertaken at negotiated contracted prices on usual commercial terms and at arm's length basis.

29 Financial instruments

29.1 Significant accounting policies

Details of significant policies and methods adopted including the criteria for recognition for the basis of measurement in respect of each class of financial assets and financial liabilities are disclosed in Note 3 to the financial statements.

29.2 Categories of financial instruments

Management considers that the carrying amounts of financial assets and financial liabilities recognised at amortised cost in the financial statements approximate their fair values.

	As of March 31, 2026	As of March 31, 2025
Financial assets:		
Measured at amortised cost:		
Cash and cash equivalents	14,85,49,771	11,14,49,462
Accounts and other receivables (less prepayments and advances)	3,23,14,477	2,61,95,794
Other financial assets	25,80,73,356	15,99,87,525
Financial assets at FVTPL:		
Investments in Mutual Funds	4,60,69,410	
Investments in Dual Currency Notes	1,60,94,324	
Financial assets at FVTOCI:		
Investments in USD Bonds	1,46,34,581	1,44,03,988
Total	51,57,35,919	31,20,36,769
Financial liabilities:		
Measured at amortised cost:		
Accounts and other payables (less advances and VAT & Tax payable)	8,41,96,756	7,04,10,800
Other financial liabilities	59,72,201	1,40,03,107
Lease liabilities	3,03,68,157	3,31,47,368
Total	12,05,37,114	11,75,61,275

29.3 Fair Value Measurement

The following table provides the fair value measurements hierarchy of the Company's financial assets and liabilities:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to Level 3, as described below.

As of March 31, 2026

Financial assets	Fair value	Fair value hierarchy	
	As of March 31, 2026	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2) Significant unobservable inputs
Financial assets carried at fair value through Profit or Loss (FVTPL)			
Investments in Mutual Funds	4,60,69,410	4,60,69,410	
Investments in Dual Currency Notes	1,60,94,324		1,60,94,324
Financial assets carried at fair value through other comprehensive income (FVTOCI)			
Investments in USD Bonds	1,46,34,581		1,46,34,581

As of March 31, 2025

Financial assets	Fair value	Fair value hierarchy	
	As of March 31, 2025	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2) Significant unobservable inputs (Level 3)
Financial assets carried at fair value through other comprehensive income (FVTOCI)			
Investments in USD Bonds	1,44,03,988		1,44,03,988

Financial instrument measured at amortised cost

The carrying amount of financial assets and financial liabilities measured at amortised cost in the financial statements are a reasonable approximation of their fair value since the group does not anticipate that the carrying amounts would be significantly different from the values that would eventually be received or settled.

There has been no transfers between level 1, level 2 and level 3 for the year ended March 31, 2026 and 2025.

29.4 Financial risk management- objectives and policies

The group's board of directors has the overall responsibility for the management of these risks and is supported by risk management committee that advises on the appropriate financial risk governance framework. The group has the risk management policies and systems in place and are reviewed regularly to reflect changes in market conditions and the group's activities. The group's risk management committee oversees how management monitors compliance with the risk management policies and procedures, and reviews the adequacy of risk management framework in relation to the risks faced by the group. The framework seeks to identify, assess and mitigate financial risk in order to minimise potential adverse effects on the group's financial performance.

The group's financial liabilities comprise mainly of Account payables and others payable. The group's financial assets comprise mainly of investments, cash and cash equivalents, other bank balances, Account receivable and other receivables.

BLS INTERNATIONAL FZE

Notes to the Financial Statements (continued)
For the year ended March 31, 2026

30 Financial risk management objectives

Management reviews overall financial and other risks covering specific areas, such as capital risk, liquidity risk, credit risk and market risk.

The Group's profile concerning exposure to financial risks identified below continues to be consistent.

30.1 Capital risk management

The capital is being managed by the Group in such a way that it is able to continue as a going concern while maximizing returns to investor. The group's overall strategy remains unchanged from previous year.

The capital structure of the Group consists of equity attributable to the shareholder of the group; comprising of share capital, FVTOCI and retained earnings as disclosed in the statement of changes in equity.

30.2 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimizing the return. The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates and interest rates.

30.2.1 Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The primary market risk to the Company is foreign exchange risk.

* There is no foreign currency exposure as USD to AED rate is pegged.

Foreign currency sensitivity

Sensitivity analysis is computed based on the changes in the income and expenses in foreign currency upon conversion into functional currency, due to exchange rate fluctuations between the previous reporting period and the current reporting period. The below table demonstrates the sensitivity to a 0.25% increase or decrease in the foreign currency against AED, with all other variable held constant. The sensitivity analysis is prepared on the net unhedged exposure of the group as at the reporting date. 0.25% represents management's assessment of reasonably possible change in foreign exchange rate.

BLS INTERNATIONAL FZE
Sharjah - United Arab Emirates

Notes to the Financial Statements (continued)
For the year ended March 31, 2026

30.2.2 Interest rate risk

The group is not exposed to significant interest rate risk as it does not hold any assets or liabilities with floating interest rates.

30.3 Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the group and arises principally from the group's accounts and other receivables and bank balances. The group has adopted a policy of only dealing with creditworthy counterparties.

The group attempts to control credit risk by monitoring credit exposures, limiting transactions with specific non-related counterparties, and continually assessing the creditworthiness of such non-related counterparties. Balances with banks are assessed to have low credit risk of default since these banks are highly regulated by the central banks of the respective countries.

The concentration of credit risk arises when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have identical economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. The concentration of credit risk indicates the relative sensitivity of the group's performance to developments affecting a particular industry or geographic location. All balances with banks represent local commercial banks.

The amount that best represents maximum credit risk exposure on financial assets at the end of the reporting period, in the event counterparties fail to perform their obligations, generally approximates their carrying value. Accounts and other receivables and balances with banks are not secured by any collateral. The tables below detail the credit quality of the group's financial assets as well as the group's maximum exposure to credit risk by credit risk rating grades.

Credit risk grading framework:

The group's current credit risk grading framework comprises the following categories:

Category	Description	Basis for recognising expected credit losses (ECL)
Performing	The counterparty has a low risk of default and does not have any past-due amounts	12 months ECL
Doubtful	The amount is >90 days past due or there has been a significant increase in credit risk since initial recognition.	Lifetime ECL - not credit - impaired
In Default	The amount is >365 days past due or there is evidence indicating the asset is credit-impaired.	Lifetime ECL - credit - impaired
Write -Off	There is evidence indicating that the debtor is in severe financial difficulty and the Group has no realistic prospect of recovery	The amount is written off

The tables below detail the credit quality of the Group's financial assets and other items, as well as maximum exposure to credit risk by credit risk rating grades:

Group	Rating	12 month or Lifetime ECL	Gross carrying amount	Loss allowance	Net carrying amount
31-Mar-2026					
	(i)	Lifetime ECL (Simplified Approach)			
Accounts receivables			1,25,52,349	(12,34,327)	1,13,18,021
Investments	(ii)	12 months' ECL	7,67,98,315	-	7,67,98,315
Cash and cash equivalents	(iii)	12 months' ECL	14,85,49,771	-	14,85,49,771
Other financial assets	(iii)	12 months' ECL	25,80,73,356	-	25,80,73,356
Due from related parties (Note 30)	(iii)	12 months' ECL	2,54,79,482	-	2,54,79,482
Other receivables	(iii)	12 months' ECL	59,53,892	-	59,53,892
31-Mar-2025					
	(i)	Lifetime ECL (Simplified Approach)			
Accounts receivables			1,45,47,972	(21,64,742)	1,23,83,230
Investments	(ii)	12 months' ECL	1,45,07,275	-	1,45,07,275
Cash and cash equivalents	(iii)	12 months' ECL	11,14,49,462	-	11,14,49,462
Other financial assets	(iii)	12 months' ECL	15,99,87,525	-	15,99,87,525
Due from related parties (Note 30)	(iii)	12 months' ECL	1,57,20,458	-	1,57,20,458
Other receivables	(iii)	12 months' ECL	50,85,987	-	50,85,987

(i) For accounts receivables, the Group has applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL. The Group determines the expected credit losses on these items based on historical credit loss experience, adjusted as appropriate to reflect current conditions and estimates of future economic conditions.

(ii) All of the group's other investments (investment in mutual fund and Bonds) at amortised cost are considered to have low credit risk, and the loss allowance recognised during the year was therefore limited to 12 months' expected losses. Management consider low credit risk for listed instruments to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to have low credit risk when they have a low risk of default and the issuer has strong capacity to meet its contractual cash flow obligations in the near term.

(iii) The credit risk for cash deposits with banks and cash and cash equivalents is considered negligible, since the counterparties are reputable banks with high quality external credit ratings. Also, no impairment loss has been recorded in respect of fixed deposits that are with recognized commercial banks and are not past due. The carrying amounts disclosed above are the group's maximum possible credit risk exposure in relation to these deposits.

Other financial assets being security deposits and others are also due from several counter parties and based on historical information about defaults from the counter parties, management considers the quality of such assets that are not past due to be good.

Impairment on cash and cash equivalents, deposits and other financial instruments has been measured on the 12-month expected credit loss basis and reflects the short maturities of the exposures. The group considers that its cash and cash equivalents have low credit risk based on external credit ratings of counterparties.

Based on the assessment there is no impairment in the above financial assets.

Notes to the Financial Statements (continued)
For the year ended March 31, 2026

30.4 Liquidity risk

Liquidity risk refers to the risk that an entity will encounter difficulty in meeting obligations associated with its financial liabilities at maturity date.

The Group manages the liquidity risk through risk management framework for the Group's short, and long-term funding and liquidity requirements by maintaining adequate reserves and sufficient cash and cash equivalents to ensure that funds are available to meet its commitments for liabilities as they fall due.

The table below analyses the Group's remaining contractual maturity for its financial liabilities based on the remaining period at the end of the reporting period to the contractual maturity date. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant. The contractual maturity is based on the earliest date on which the Group may be required to pay.

	Within 1 year (AED)	More than 1 year (AED)	Total (AED)
As at March 31, 2026			
<i>Measured at amortised cost:</i>			
Accounts and other payables (less advances and VAT & Tax payable)	8,41,96,756	-	8,51,25,288
Lease Liabilities	1,68,82,174	1,34,85,983	3,03,68,157
	10,10,78,930	1,34,85,983	11,54,93,444
As at March 31, 2025			
<i>Measured at amortised cost:</i>			
Accounts and other payables (less advances and VAT & Tax payable)	7,04,10,800	-	7,04,10,800
Lease Liabilities	1,69,57,970	1,61,89,398	3,31,47,368
	8,73,68,770	1,61,89,398	10,35,58,168

31 Capital Management

The group manages its capital to ensure that the group will be able to continue as going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance. The capital structure of the group consists of cash and cash equivalent and total equity of the group. The group is not subject to any externally imposed capital requirements other than for covenants under various loan arrangements of the group. The Holding Company's Board of Directors reviews the capital structure of the group on need basis. As part of this review, the Board considers the cost of capital and the risks associated with each class of capital. Amongst other things, the group's objective for capital management is to ensure that it maintains stable capital management by monitoring the financial covenants attached to the interest bearing loans and borrowings. The gearing ratio at March 31, 2026 and March 31, 2025 is as follows:

Gearing ratio		
Particulars	As of March 31, 2026	As of March 31, 2025
Debt	9,02,09,412	8,78,90,275
Cash and Cash equivalent	14,85,49,771	11,14,49,462
Net Debt (A)	(5,83,40,359)	(2,35,59,187)
Total equity (B)	84,44,45,219	59,62,48,352
Overall financing (C= A+B)	78,61,04,859	57,26,89,165
Gearing ratio (A/C)	-7.42%	-4.11%

32 Fair Value hierarchy

The Group measures financial assets such as financial assets at FVTOCI and FVTPL at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between the market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes places either:

- In the principal market for asset or liability, or
- In the absence of the principal market, in the most advantageous market for asset or liability.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy mentioned in Note 3 and described below.

At year end, the Group held the following assets measured at fair value:

	Level 1 AED	Level 2 AED	Level 3 AED
As at March 31, 2026			
Investment at FVTPL	4,60,69,410	1,60,94,324	-
Investments at FVTOCI	-	1,46,34,581	-
	4,60,69,410	3,07,28,905	-
As at March 31, 2025			
Investment at FVTPL	-	-	-
Investments at FVTOCI	-	1,44,03,988	-
	-	1,44,03,988	-
