1 Corporate information

Starfin India Private Limited (the 'Company') is a private Company domiciled in India and incorporated under the provisions of Companies Act 2013 ("the Act"). The registered office of the Company is located at Plot no. 865, Udyog, Vijar Phase-V, Gurugram, India.

The Company is primarily engaged in providing services to the bank account holders on behalf of SBI (State Bank of India), CBI (Central Bank of India), Bank of Baroda, PNB (Punjab National Bank), Paytm Bank Limited, Union Bank of India, Uttarakhand Gramin Bank, Gujarat Gramin Bank, Baroda Rajasthan Kshetriya Gramin Bank, Indian Bank, Indian Overseas Bank.

These financial statements were approved and adopted by Board of Directors of the Company in their meeting held on May 13, 2026.

2 Basis of preparation of financial statements and material accounting policies

2. a Basis of preparation of financial statements

(i) Statement of compliance :

The financial statements have been prepared in accordance with Indian Accounting Standards (IND AS) as prescribed under Section 133 of the Companies Act, 2013 read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) (Amendment) Rules, 2016 and relevant provisions of the Act as amended.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use

(ii) Basis of preparation:

The financial statements have been prepared and presented under the historical cost convention, on the accrual basis of accounting except for financial assets and liabilities that are measured at fair values at the end of each reporting period, as stated in the accounting policy set out below:

In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and / or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102 - Share-based Payment, leasing transactions that are within the scope of Ind AS 116 - Leases, and measurements that have some similarities to fair value but are not fair value, such as value in use in Ind AS 36 - Impairment of assets.

The financial statements are presentation in Indian Rupees (Rs) all the values are rounded off to the nearest lakhs except number of shares, face value of share, earning per share or wherever otherwise indicated.

(iii) Functional and presentation currency:

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ("the functional currency"). The financial statements are presented in Indian National Rupee ('INR'), which is the Company's functional and presentation currency.

(iv) Use of estimates:

The preparation of the financial statements in conformity with IND AS requires management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed in note.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

(v) Current and non current classification:

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of product & activities of the Company and their realisation in cash and cash equivalent, the Company has determined its operating cycle as twelve months for the purpose of current and non-current classification of assets and liabilities. Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2. b Material accounting policies for the year ended March 31, 2026

The Company has consistently applied the following accounting policies to all periods presented in the financial statements.

(a) Revenue recognition

Sale of services

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

The Company is primarily engaged in providing services to the bank account holders on behalf of SBI (State Bank of India) and allied services is recognised as income, when services are rendered to customers.

Sale of products

Revenue from the sale of goods is recognised at the point in time when control is transferred to the customer.

Revenue is measured based on the transaction price, which is the consideration, adjusted for turnover discounts to customer as specified in the contract with the customers. When the level of discount varies with increase in levels of revenue transactions, the Company recognises the liability based on its estimate of the customer's future purchases. If it is probable that the criteria for the discount will not be met, or if the amount thereof cannot be estimated reliably, then discount is not recognised until the payment is probable and the amount can be estimated reliably. The Company recognises changes in the estimated amount of obligations for discounts in the period in which the change occurs. Revenue also excludes taxes collected from customers.

Revenue in excess of invoicing are classified as contract assets while invoicing in excess of revenues are classified as contract liabilities

Other income

(i) Interest income

Interest income is recognized on time proportion basis using the effective interest method.

(ii) Dividend income

Dividend income is accounted for when the right to receive the dividend is established.

(iii) Rental income

Income from sub let of property is recognised on accrual basis in accordance with sub-let agreement.

(iv) Profit/(loss) on sale of Property, plant and equipment/Investment

Profit/(loss) on sale of property, plant and equipment/investment is recognised in profit and loss account at the time of sale of property, plant and equipment/investment.

(b) Property plant and equipment

On transition to Ind AS, the Company has adopted optional exception under Ind AS- 101 to measure property, plant and equipment at deemed Cost. Consequently the carrying value has been assumed to be deemed cost of property, plant and equipment on the date of transition. Subsequently property, plant and equipment are carried at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenditure that is directly attributable to the acquisition of the items.

Property, plant and equipment acquired after the transition date are stated at cost net of tax, less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenses directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Subsequent expenditures relating to property, plant and equipment is capitalized only when it is probable that future economic benefits associated with these will flow to the Company and the costs to the item can be measured reliably. Repairs and maintenance costs are recognized in net profit in the statement of profit and loss when incurred. The cost and related accumulated depreciation are eliminated from the financial statements upon sale or retirement of the asset and the resultant gain or losses are recognized in the statement of profit and loss.

Depreciation is provided on written down value method over the useful lives of property, plant and equipment as estimated by management. Depreciation is provided prorata basis on written down value at the rates determined based on estimated useful lives of property, plant and equipment where applicable, prescribed under Schedule II to the Act. The residual value, useful lives and method of depreciation of property, plant and equipment is reviewed at each financial year and adjusted prospectively, if appropriate. The useful life of various class of items considered in the financial statements is as under:

Class of assets	Useful life (in years)
Computers	3
Office equipments	5
Furniture and fixtures	10
Vehicles	8

(c) Intangible assets

Intangible assets are recognised, if the future economic benefits attributable to the assets are expected to flow to the Company and cost of the asset can be measured reliably. All other expenditure is expensed as incurred. The same are amortised over the expected duration of benefits. Such intangible assets are measured at cost less any accumulated amortisation and impairment losses, if any and are amortised over their respective individual estimated useful life on straight line method.

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period and adjusted prospectively, if appropriate.

Class of assets	Useful life (in years)
Software	3

(d) Impairment

The carrying amount of property, plant and equipments, intangible assets and investment property are reviewed at each balance sheet date to assess impairment if any, based on internal/external factors. An asset is treated as impaired, when the carrying cost of asset exceeds its recoverable value, being higher of value in use and net selling price. An impairment loss is recognised as an expense in the statement of profit and loss in the year in which an asset is identified as impaired. The impairment loss recognised in prior accounting period is reversed, if there has been an improvement in recoverable amount.

(e) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Financial assets include investments, trade receivables, security deposits, cash and cash equivalents, fixed deposit and other financial assets.

At initial recognition, all financial assets are measured at fair value. Such financial assets are subsequently classified under following three categories according to the purpose for which they are held. The classification is reviewed at the end of each reporting period.

Financial assets at amortised cost

At the date of initial recognition, financial assets are held to collect contractual cash flows of principal and interest on principal amount outstanding on specified dates. These financial assets are intended to be held until maturity. Therefore, they are subsequently measured at amortised cost by applying the effective interest rate (EIR) method to the gross carrying amount of the financial asset. The EIR amortisation is included as interest income in the profit or loss. The losses arising from impairment are recognised in the profit or loss.

Financial assets at fair value through other comprehensive income

At the date of initial recognition, financial assets are held to collect contractual cash flows of principal and interest on principal amount outstanding on specified dates, as well as held for selling. Therefore, they are subsequently measured at each reporting date at fair value, with all fair value movements recognised in other comprehensive income (OCI). Interest income calculated using the effective interest rate (EIR) method, impairment gain or loss and foreign exchange gain or loss are recognised in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in other comprehensive income is reclassified from the OCI to statement of profit and loss.

Financial assets at fair value through profit or loss

At the date of initial recognition, financial assets are held for trading, or which are measured neither at amortised cost nor at fair value through OCI. Therefore, they are subsequently measured at each reporting date at fair value, with all fair value movements recognised in the statement of profit and loss.

Trade receivables, security deposits, cash and cash equivalents, fixed deposit and other financial assets are classified for measurement at amortised cost while investments may fall under any of the aforesaid classes. However, in respect of particular investments in equity instruments that would otherwise be measured at fair value through profit or loss, an irrevocable election at initial recognition may be made to present subsequent changes in fair value through other comprehensive income.

Impairment

The Company assesses at each reporting date whether a financial asset (or a group of financial assets) such as investments, trade receivables, advances and security deposits held at amortised cost and financial assets that are measured at fair value through other comprehensive income are tested for impairment based on evidence or information that is available without undue cost or effort. Expected credit losses are assessed and loss allowances recognised if the credit quality of the financial asset has deteriorated significantly since initial recognition.

De-recognition

Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

Lease liabilities, trade payables and other financial liabilities are initially recognised at the value of the respective contractual obligations. They are subsequently measured at amortised cost. Any discount or premium on redemption / settlement is recognised in the statement of profit and loss as finance cost over the life of the liability using the effective interest method.

For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount is included in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(f) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using other valuation technique. In estimating the fair value of an asset or liability, the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Fair values for measurement and/ or disclosure purposes are categorised into level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

Level 1 - This includes financial instruments measured using quoted prices.

Level 2 - The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2. Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

(g) Leases

The Company assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Company recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis from the commencement date over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

ii) Lease liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

iii) Short-term leases and leases of low-value assets

The Company has elected not to recognise right-of-use assets and lease liabilities for short term leases of all assets that have a lease term of 12 months or less and leases of low-value assets. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease.

Company as a lessor

Leases for which the Company is a lessor is classified as finance or operating lease. When the terms of the lease transfer substantially all of the risks and benefits incidental to ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases. For operating leases, rental income is recognized on a straight line basis over the term of relevant lease.

(h) Employee benefits

i. Provident fund and employee state insurance

The Company makes contribution to statutory provident fund and employee state insurance fund in accordance with Employees Provident Fund and Miscellaneous Provisions Act, 1952 and Employee State Insurance Act, 1948 which is a defined contribution plan and contribution paid or payable is recognized as an expense in the period in which services are rendered by the employee.

ii. Gratuity

Gratuity is a post employment benefit and is in the nature of a defined benefit plan. The liability recognised in the balance sheet in respect of gratuity is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is determined by actuarial valuation as on the balance sheet date, using the projected unit credit method.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to the statement of profit and loss in the year in which such gains or losses arise.

iii. Compensated absences

Liability in respect of compensated absences becoming due or expected to be availed within one year from the balance sheet date is recognised on the basis of discounted value of estimated amount required to be paid or estimated value of benefit expected to be availed by the employees. Liability in respect of compensated absences becoming due or expected to be availed more than one year after the balance sheet date is estimated on the basis of an actuarial valuation performed by an independent actuary using the projected unit credit method.

Actuarial gains and losses arising from past experience and changes in actuarial assumptions are charged to statement of profit and loss in the year in which such gains or losses are determined.

iv. Other short term benefits

Expense in respect of other short term benefit is recognised on the basis of amount paid or payable for the period during which services are rendered by the employee.

(i) Earning per share

Basic earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the period.

Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

(j) Income tax

Income tax expense comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year after taking credit of the benefits available under the Income Tax Act and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the reporting date.

Current tax assets and liabilities are offset only if, the Company:

- i) Has a legally enforceable right to set off the recognised amounts; and
- ii) Intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding tax bases used for taxation purposes.

Deferred tax is not recognised for:

- i) temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss; and
- ii) temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.

A deferred income tax asset is recognised to the extent that it is probable that future taxable profits will be available against which deductible temporary differences and tax losses can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be used.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if:

- i) The entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- ii) The deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

(k) Borrowing cost

Borrowing cost that are directly attributable to the acquisition, construction, or production of a qualifying asset are capitalized as a part of the cost of such asset till such time the asset is ready for its intended use or sale. Borrowing cost consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing costs also includes exchange differences to the extent regarded as an adjustment to the borrowing costs. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use or sale. All other borrowing cost are recognized as expense in the period in which they are incurred.

(l) Cash and cash equivalents

The cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short term, highly liquid investments with original maturities of three months or less and which are subject to an insignificant risk of changes in value.

(m) Provisions, contingent assets and contingent liabilities:

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost. Contingent Liability is disclosed after careful evaluation of facts, uncertainties and possibility of reimbursement, unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent liabilities are not recognised but are disclosed in notes. Contingent assets are not disclosed in the financial statements unless an inflow of economic benefits is probable.

(n) Foreign currency transactions

The functional and presentation currency of the Company is Indian Rupee. Transactions in foreign currency are accounted for at the exchange rate prevailing on the transaction date. Gains/ losses arising on settlement as also on translation of monetary items are recognised in the statement of profit and loss. Exchange differences arising on monetary items that, in substance, form part of the Company's net investment in a foreign operation (having a functional currency other than Indian Rupee) are accumulated in foreign currency translation reserve.

(o) Cash flow statements

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated. The Company considers all highly liquid investments that are readily convertible to known amounts of cash to be cash equivalents.

(p) Operating segments

(i) Identification of segments

The Company's operating businesses are organized and managed separately according to the nature of products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets.

(ii) Unallocated items

Unallocated items include general corporate income and expense items which are not allocated to any business segment.

(iii) Segment accounting policies

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

2. C Material accounting judgements, estimates and assumptions

In the process of applying the Company's accounting policies, management has made the following estimates, assumptions and judgements which have significant effect on the amounts recognized in the financial statements:

a) Income taxes

Judgment of the Management is required for the calculation of provision for income taxes and deferred tax assets and liabilities. The Company reviews at each balance sheet date the carrying amount of deferred tax assets. The factors used in estimates may differ from actual outcome which could lead to significant adjustment to the amounts reported in the standalone financial statements.

b) Contingencies

Judgment of the management is required for estimating the possible outflow of resources, if any, in respect of contingencies/claim/litigations against the Company as it is not possible to predict the outcome of pending matters with accuracy.

c) Allowance for uncollected accounts receivable and advances

Trade receivables do not carry any interest and are stated at their normal value as reduced by appropriate allowances for estimated irrecoverable amounts. Individual trade receivables are written off when management deems them not collectible. Impairment is made on ECL, which are the present value of the cash shortfall over the expected life of the financial assets.

d) Defined benefit plans

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in future. These includes the determination of the discount rate, future salary increases, mortality rates and attrition rate. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

2. D Recent accounting pronouncements

The below amendments to the existing standard which are notified by Ministry of Corporate Affairs but are not yet effective: Amendment to Ind AS 1 'Presentation of Financial Statements'- Classification of Liabilities as current or non-current and non-current liabilities with covenants. The amendment includes specific provisions that will take effect for reporting periods beginning on or after April 1, 2026, retrospectively, as outlined below:

- a) Breach of material covenant for long-term loan arrangement on or before end of reporting period with effect that liability becomes payable on demand as on reporting date, then it shall be classified as current liability, if lender agreed after reporting period and before approval of financial statements to not demand payment as a consequence of breach.
- b) Classify as non-current liability, if lender agreed by end of reporting period to provide grace period ending at least 12 months after reporting period within which entity can rectify the breach provided lender does not demand immediate repayment.
- c) Disclose information about the timing of settlement to understand the impact of the liability on the financial statements.

The Company does not expect this amendment to have an impact on its operations or financial statements.

Starfin India Private Limited

33 Employee benefits

A) Defined contribution plan:-

The Company makes contributions towards a provident fund under a defined contribution retirement benefit plan for qualifying employees. The provident fund is administered by Employee Provident Fund Organisation. Under this scheme, the Company is required to contribute a specified percentage of payroll cost to fund the benefits. Both the employees and the Company make pre-determined contributions to the provident fund.

Amount recognized as expense amounts to Rs. 23.84 lakh for the year ended March 31, 2026 (for the year ended March 31, 2025: Rs. 25.92 lakh) under contributions to provident and other funds.

B) Leave plan and compensated absences

Leave plan and compensated absences The Company has a leave encashment scheme with defined benefits for its employees. The Company makes provision for such liability in the books of accounts on the basis of year end actuarial valuation. The Company has recognized provision of Rs. 7.47 lakh for year ended March 31,2026 (for the year ended March 31,2025: Rs. 13 lakh) under leave encashment provision.

C) Employee benefits obligations consist of the following:

a) Employee benefits obligations : non current

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Gratuity liability	33.74	25.26
Total liability	33.74	25.26

b) Employee benefits obligations :current

Particulars	Year ended March 31, 2026	Year ended March 31, 2025
Gratuity liability	2.41	0.53
Total liability	2.41	0.53

c) Defined benefit plan:-

Gratuity

1. Table showing changes in present value of obligations:

Period	Year ended March 31, 2026	Year ended March 31, 2025
Present value of the obligation at the beginning of the period	25.79	17.42
Interest cost	1.81	1.26
Current service cost	9.26	9.10
Past service cost	5.30	-
Benefits paid (if any)	-	(1.21)
Actuarial (gain)/loss	(6.00)	(0.78)
Present value of the obligation at the end of the period	36.15	25.79

Birfurcation of total actuarial (gain)/loss on liabilities

Period	Year ended March 31, 2026	Year ended March 31, 2025

Actuarial (gain) losses from changes in financial assumptions	(6.85)	0.32
Experience Adjustment (gain)/ loss for plan liabilities	0.85	(1.10)
Total amount recognized in other comprehensive income	(6.00)	(0.78)

2. The amount to be recognized in the balance sheet

Period	As at March 31, 2026	As at March 31, 2025
Present value of the obligation at the end of the period	36.15	25.79
Net liability/(asset) recognized in Balance Sheet and related analysis	36.15	25.79
Funded status- surplus/(deficit)	(36.15)	(25.79)

3. Expense recognized in the statement of profit and loss

Period	Year ended March 31, 2026	Year ended March 31, 2025
Interest cost	1.81	1.26
Current service cost	9.26	9.10
Past Service Cost	5.30	-
Expenses to be recognized in the statement of P&L accounts	16.37	10.36

4. Other comprehensive (income)/expenses (remeasurement)

Period	Year ended March 31, 2026	Year ended March 31, 2025
--------	------------------------------	------------------------------

Cumulative unrecognized actuarial (gain)/loss- opening balance	(13.10)	(12.32)
Actuarial (gain)/loss - obligation	(6.00)	(0.78)
Actuarial (gain)/loss - plan assets		-
Total actuarial (gain)/loss c/f	(6.00)	(0.78)
Cumulative total actuarial (gain)/loss c/f	(19.10)	(13.10)

5. Net interest cost

Period	Year ended March 31, 2026	Year ended March 31, 2025
Interest cost on defined benefit obligation	1.81	1.26
Net interest cost (income)	1.81	1.26

6. Experience adjustment

Period	Year ended March 31, 2026	Year ended March 31, 2025
Experience adjustment (gain)/loss for plan liabilities	0.85	(1.10)
Experience adjustment gain/ (loss) for plan assets	-	-

7. Summary of membership data at the date of valuation and statistics based thereon:

Period	As at March 31, 2026	As at March 31, 2025
Number of employees	106	169
Total monthly salary	22.65	27.17
Average past service(years)	2.70	1.60
Average remaining working lives of employees(years)	25.20	29.00
Average age(years)	34.80	31.00
Weighted average duration (based on discounted cash flows) in years	20.00	23.00
Average monthly salary	0.21	0.16

The assumptions employed for calculations are tabulated:

Discount rate	7.75% per annum	7.0% per annum
Salary growth rate	7.0% per annum	7.0% per annum
Mortality	IALM2012-14	IALM2012-14
Withdrawal rate (per annum)	10.00% p.a.	10.00% p.a.

Benefits valued

Normal retirement age	60 Years	60 Years
Salary	Last drawn qualifying salary	Last drawn qualifying salary
Vesting period	5 Years of service	5 Years of service
Benefits on normal retirement	15/26*Salary*Past Service (yr)	15/26*Salary*Past Service (yr)
Benefit on early exit due to death and disability	As above except that no vesting conditions apply	As above except that no vesting conditions apply
Limit	2000000	2000000

7. Current liability (It is probable outlay in next 12 months as required by the Companies Act) :

Period	As at March 31, 2026	As at March 31, 2025
Current liability (short term)	2.41	0.53
Non current liability (long term)	33.75	25.26
Total liability	36.16	25.79

8. Sensitivity analysis :

Significant actuarial assumption for the determination of the defined benefit obligation are discount rate and expected salary increase rate. Effect of change in mortality is negligible. Please note that the sensitivity analysis presented below may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumption would occur in isolation of one another as some of the assumption may be correlated. The result of the sensitivity analysis are given below:

	Effect of 1% increase		Effect of 1% decrease	
	As at March 31, 2026	As at March 31, 2025	As at March 31, 2026	As at March 31, 2025
Impact of change in salary growth rate	2.84	2.2	(2.54)	(1.94)
Impact of change in discount rate	(2.50)	(1.93)	2.85	2.22
Impact of change in withdrawal rate	(0.19)	(0.39)	0.18	0.4

9. Maturity profile of projected benefit obligation: from the fund

Period	As at March 31, 2026	As at March 31, 2025
	Gratuity (unfunded)	Gratuity (unfunded)
1st following year	2.41	0.53
2nd following year	0.93	0.53
3rd following year	1.00	0.56
4th following year	1.05	0.60
5th following year	1.05	0.63
After 5 years	29.72	22.94

34 Income taxes

a. Amount recognised in statement of profit and loss

Particulars	For the year ended March 31, 2026	For the year ended March 31, 2025

38 (2) Fair value measurements

The following table provides the fair value measurements hierarchy of the Company's financial assets and liabilities:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level I to Level 3, as described

As at March 31, 2026

Financial assets	Fair value	Fair value hierarchy		
		As at March 31, 2026	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2) Significant unobservable inputs (Level 3)
Financial assets carried at fair value through profit and loss				
Investments in liquid funds	452.66	452.66	-	-

As at March 31, 2025

Financial assets	Fair value	Fair value hierarchy		
		As at March 31, 2025	Quoted prices in active markets	Significant observable inputs Significant unobservable inputs
Financial assets carried at fair value through profit and loss				
Investments in liquid funds	505.42	505.42	-	-

Financial instrument measured at amortised cost

The carrying amount of financial assets and financial liabilities measured at amortised cost in the financial statements are a reasonable approximation of their fair value since the Company does not anticipate that the carrying amounts would be significantly different from the values that would eventually be received or settled.

38 (3) Financial risk management- objectives and policies

The Company's financial liabilities comprise mainly of trade payable, lease liability and others payable. The Company's financial assets comprise mainly of investments, cash and cash equivalents, other bank balances, trade receivables and other receivables.

The Company has exposure to the following risks arising from financial instruments:

- Credit risk
- Liquidity risk; and
- Market risk

a) Risk management framework

The Company's board of directors has the overall responsibility for the management of these risks and is supported by Senior Management that advises on the appropriate financial risk governance framework. The Company has the risk management policies and systems in place and are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company's audit committee oversees how management monitors compliance with the risk management policies and procedures, and reviews the adequacy of risk management framework in relation to the risks faced by the Company. The framework seeks to identify, assess and mitigate financial risk in order to minimise potential adverse effects on the Company's financial performance.

Notes forming part of the financial statements for the year ended March 31, 2026

b) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligation, and arises from the operating activities primarily (trade receivables) and investing activities including deposits with banks and other corporate deposits. The Company establishes an allowance for impairment that represents its estimate of expected losses in respect of financial assets. A default of financial assets is when there is a significant increase in the credit

(i) Trade and other receivables:

Customer credit risk is managed based on Company's established policy, procedures and controls. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

Credit risk is reduced by receiving pre-payments. The Company has a well defined sales policy to minimize its risk of credit defaults. Outstading customer receivables are regularly monitored and assessed. Impairment analysis is performed based on historical data at each reporting date on an individual basis.

Expected credit loss under simplified approach for trade receivables:

Ageing	As at March 31, 2026	As at March 31, 2025
Ageing of gross carrying amount		
Unbilled revenue	42.17	-
Less than 180 days	358.60	269.51
181-365	1.59	0.35
More than 1 year	-	3.14
Gross carrying amount	402.36	273.00
Expected credit loss	-	-
Net carrying amount	402.36	273.00

(ii) Cash and cash equivalents, deposits with banks and other financial instruments:

Credit risk from balances with banks and other financial instruments is managed by Company in accordance with its policy. Investments of surplus funds are made only with Impairment on cash and cash equivalents, deposits and other financial instruments has been measured on the 12-month expected credit loss basis and reflects the short Based on the assessment there is no impairment in the above financial assets.

c) Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. The Company's treasury department is responsible for maintenance of liquidity, continuity of funding as well as timely settlement of debts. In addition, policies related to mitigation of risks are overseen by senior management. Management monitors the Company's net liquidity position on the basis of expected cash flows vis a vis debt service fulfilment obligation.

Maturity profile of financial liabilities

The table below provides details regarding the remaining contractual maturities of financial liabilities at the reporting date based on contractual undiscounted payments.

Particulars	Less than 1 year	1-5 years	Total
As at March 31, 2026			
Trade payables	283.71	-	283.71
Other financial liabilities	381.09	-	381.09
Lease liabilities	106.77	-	106.77
As at March 31, 2025			
Trade payables	194.56	1.65	196.21
Other financial liabilities	492.14	-	492.14
Lease liabilities	165.60	110.40	276.00

d) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of fluctuation in market prices. These comprise three types of risk i.e. currency rate, interest rate and other price related risks. Financial instruments affected by market risk include loans and borrowings, deposits, investments, and financial instruments. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Regular interaction with bankers, intermediaries and the market participants help us to mitigate such risk.

i) Interest rate risk and sensitivity

The Company has no borrowings during the year. Therefore, there is no interest rate risk.

ii) Price risks

The primary goal of the Company's investment is to maintain liquidity along with meeting group's strategic purposes. Depending upon the investment strategy at inception, management classifies certain investments as FVTPL. The following table details the group sensitivity to a 1% increase and decrease in the price of instruments.

	As at March 31, 2026	As at March 31, 2025
Impact on profit/(loss) for the year/period		
Market price increase by 1%	4.53	5.05
Market price decrease by 1%	(4.53)	(5.05)

38 (4) Capital management

The primary objective of the company's capital management is to maximise the shareholder value. Equity share capital and other equity are considered for the purpose of company's capital management. In order to maintain or adjust the capital structure, the company may adjust the amount of dividends paid to shareholders, returns capital to shareholders, issues new shares and raises money through borrowings.

No changes were made in the objectives, policies or processes for managing capital of the Company during the years ended March 31, 2026 and March 31, 2025.
